

PREPARED FOR

Anthropic

Ricardo M. Martins

Applied AI Architect, Industries | Candidate profile

Connecting **enterprise customers, product teams** and **AI capabilities**
to turn business priorities into useful, reliable adoption.

Currently: Principal Cloud & AI Solutions Engineer, Digital Natives, Microsoft

A career built at the intersection of technology, customers, and product impact

- 23+ years** ✓ **Technology & infrastructure**
From ISPs and media platforms to global cloud and technology companies.
- 10+ years** ✓ **Public cloud**
Designing, automating and operating reliable systems across AWS, Azure and hybrid environments.
- 10+ years** ✓ **Customer-facing technical leadership**
Advising enterprise customers, partners, developers and executives as an architect, trainer, customer engineer and solutions engineer.
- 6+ years** ✓ **Product, partner & developer ecosystems**
Translating customer requirements and field insights into product priorities, enablement, documentation and adoption.

Career journey: From infrastructure to AI adoption

Apr 2024-present

Principal Cloud & AI Solutions Engineer - Microsoft

Lead cloud and AI engagements with digital-native customers, guiding adoption of Microsoft Foundry and Azure OpenAI. Advise on AI workload and Kubernetes architecture, covering compute, networking, identity, security, reliability, capacity and cost.

Jan 2023-Mar 2024

Senior Managed OpenShift Black Belt - Red Hat

Technical pre-sales, architecture and customer enablement for managed OpenShift, Azure RedHat OpenShift and hybrid Kubernetes environments.

Dec 2015-Jan 2023

Cloud Solution Architect, Azure Technical Trainer and Customer Engineer - Microsoft

Began in Brazil helping enterprises modernize and migrate to Azure. Later moved to the U.S. for technical training and customer engineering, with architecture guidance, reliability work and product feedback.

Apr 2003-Dec 2015

Systems engineering & SRE - Bemobi, Globo.com, Equinix, Groupon Brazil and others

Built a foundation in Linux, networking, automation and production reliability that continues to shape my approach to cloud and AI architecture.

Concurrent consulting
& entrepreneurship
2013-2015

Co-founder, cloud architect & SRE - Storme and startup engagements

Co-founded Storme, a cloud company focused on Magento and WordPress migrations to AWS. Supported startup architecture, reliability, multi-region deployments and infrastructure automation alongside primary employment.

Joined **Microsoft in 2015** to help customers adopt Azure. Deepened **OpenShift and open-source** experience at Red Hat in 2023. Returned to Microsoft in 2024 for **cloud and AI adoption**.

Now exploring **Anthropic** to focus more directly on how enterprises use and evaluate AI.

How I create impact

Technical-to-business translation: Turning complex cloud, AI and reliability topics into **clear decisions and value propositions** for developers, architects and executives.

Customer & partner leadership: Building **trusted-advisor relationships**, leading architecture reviews, managing escalations and helping stakeholders agree on outcomes.

Product & ecosystem influence: Converting recurring **customer needs and field signals** into **actionable feedback** for Engineering, Product and partner teams.

Developer enablement & scale: Creating **training, documentation, tools and communities** that make adoption repeatable beyond a single customer engagement.

Qualifications & Technical foundation

Cloud, open-source platforms, Kubernetes and AI infrastructure.

Cloud experience: More than a decade in cloud architecture, migration, reliability and technical pre-sales. I help organizations modernize and build scalable environments across **Azure, AWS and hybrid ecosystems**.

Technical foundation: Linux, networking, automation, containers, Kubernetes, CI/CD and open-source platforms. This background helps me connect **enterprise systems with AI workloads and application integration**.

Certifications: Credentials across **NVIDIA, Azure, Red Hat, Kubernetes, Linux and AWS** reflect continued investment in architecture, security, networking and AI infrastructure.

Cross-functional impact & Developer enablement

Turning field experience into reusable knowledge, product feedback and practical adoption.

Official & cross-functional contributions

- Microsoft Learn content, reference architectures and technical documentation.
- Linux Hackathon incorporated into Microsoft's **What the Hack** program.
- Red Hat Cloud Experts resources, including **Azure REdHat OpenShift and GPU workloads**.
- Customer feedback translated into product, engineering and enablement work.
- **8 architects mentored** at Microsoft over the two years to September 2026.
- Capacity-planning playbook presented to **127 Solutions Engineers**: five phases, four internal support tools.

PTU Calculator sessions

Independent developer ecosystem

- **Decodifica.Tech**: LLM-powered Portuguese articles and audio.
- **Azure SRE Agent Skills**: Eight instruction-based operational assessment skills.
- **AI for Infra**: 220+ page handbook for infrastructure professionals.
- **AKS Learning and K8s Hackathon**: Hands-on Kubernetes learning and practice.
- **Azure Cert Prep**: Certification learning paths, quizzes and hands-on labs.
- **PTU Calculator**: Azure OpenAI capacity-planning and pricing tool.

Trusted by customers & Cross-functional teams

Selected excerpts from professional feedback on technical expertise, collaboration and developer enablement.

Technical clarity

"One thing you do exceptionally well is your ability to **simplify complex technical concepts**. Your technical guidance has been a great unblocker for me while helping the customers especially in AKS and other infrastructure conversations. [...] It's impressive how you manage to gather customer requirements and foresee technical challenges and address them with effective solutions."

Ahmed C. | Senior Solutions Engineer

Cross-team collaboration

"Ricardo, you are always going above and beyond, effectively and efficiently working with customers and partners to surpass our targets. [...] You always build great rapport with all different teams and it shows. **Most of our stakeholders ask to have you as part of the project.**"

Ana R. | Principal Program Manager

Customer commitment

"When I reached out to you for guidance on a customer issue, **you helped me without hesitating even though you are not specifically aligned to my account.** It's important that we all work this way so that we can bring our best to our customers."

Chris S. | Strategic Account Director

Developer enablement

"I would like to commend Ricardo Martins for his exceptional work around AKS, both internally and within the external Microsoft community. [...] he also wrote a **blog post sharing the script with the wider community**. These initiatives are not only impacting and improving our customers, but they are also establishing Ricardo as one of the top AKS specialists known outside Microsoft."

Leandro C. | Cloud Solutions Architect

Customer trust & strategic planning

"he's been an incredible partner in helping us expand our services to Azure alongside AWS and GCP. He's been a huge help with **roadmap planning, network connectivity, centralized logging, and IAM**. Ricardo is super knowledgeable, responsive, and easy to work with, which has made the entire process so smooth for us."

Kris P. | Staff SRE, customer

Mentorship & team development

"Ricardo is an outstanding professional and colleague. [...] He goes above and beyond to help others and brings an immense technical background to share. I am both happy and proud that **he accepted the challenge of being my mentor at Microsoft.**"

Igor A. | Cloud Solution Architect

Recognized for strategic account impact

Leadership feedback on customer execution, business outcomes and cross-team collaboration.

Ahmed H. | Senior Director, Solutions Specialist

*"I'd like to recognize Ricardo for his exceptional impact across our territory in a very short period. He consistently leans in, even when the work is new or challenging, and has built **meaningful credibility with some of our most sophisticated customers.**"*

Selected themes from the leadership feedback

Customer execution

- Technical advisory on **Azure OpenAI**, with cross-region Product coordination around API adoption.
- Capacity and deployment guidance to help customers navigate constraints and move adoption forward.

Reusable impact

- Implementation learnings and deployment guidance shared with **Engineering and other customer teams.**

Cross-team leadership

- Territory support, cross-time-zone collaboration and practical guidance that helps colleagues act.

What I would bring to Anthropic

Enterprise customer experience, technical depth and a record of helping customers and developers move forward. I would apply that experience to **Claude API and Claude for Work adoption**, helping teams connect use cases to architecture decisions, evaluation criteria and responsible deployment.
