

Ricardo Macedo Martins

**Infrastructure depth.
Customer leadership.
Reusable impact.**

23 years in infrastructure

Senior Solutions Architect, Engagement Manager
NVIDIA Infrastructure Services (NVIS)

A career grounded in infrastructure

Each move added technical depth and a different way to work with customers.

2003-2015	2015-Jan 2023	Jan 2023-Mar 2024	Apr 2024-present
Systems and SRE	Cloud and customers	Managed OpenShift	Cloud and AI
Linux, networking and SRE operations	Cloud architecture, training and FastTrack	Container platforms and customer enablement	Cloud and AI customer engagements
Infrastructure roles	Microsoft	Red Hat	Microsoft

The common thread: understand the system, clarify the problem, help the customer move forward.

Customer work that other teams can reuse

I turn recurring customer questions into articles, tools and practical learning resources.

AI tools & operations

PTU Calculator

Provisioned AI capacity and pricing

AI for Infra

AI handbook for infrastructure teams

Azure SRE Agent Skills

8 public proactive operations skills

Technical publications

H100 distributed training

GPU instance and scaling constraints

Azure capacity planning

Quotas, reservations and compute fleet

AKS networking made easy

Practical networking guidance

Hands-on learning

AKS Learning

Kubernetes architecture and operations

K8s Hackathon

Kubernetes labs and troubleshooting

Linux Hackathon

Practical Linux challenges

407,520 cumulative views across 51 Microsoft Community Hub articles

319,121 from the 8 most-viewed articles | Public counters: 17 Sep 2026 | Views, not unique readers

<https://rmmartins.com/nvis>

Technical foundation & selected certifications

Infrastructure depth built through operations, architecture and customer engineering.

Experience I bring

Linux, networking and SRE
Cloud architecture and reliability
Kubernetes, AKS and OpenShift
GPU workload capacity planning
Customer-to-engineering coordination

NVIDIA | NCA-AIIO

AI Infrastructure and Operations
Valid Dec 2025 - Dec 2027

Earlier certification history

Azure | Red Hat | Kubernetes | Linux | AWS

Why NVIDIA. Why NVIS. Why now.

The next step in a career helping customers adopt what comes next.

NVIDIA

Closer to the systems

From cloud abstractions to the infrastructure that powers AI.

NVIS

A customer outcome

Connect technical teams and customer leaders through delivery.

MY NEXT STEP

Experience that connects

Infrastructure, cloud, Kubernetes and AI in one customer role.

NVIDIA Infrastructure Services: from early planning to an environment the customer can operate.

What I would bring to your team

Technical credibility, customer trust and a habit of making useful work reusable.

01 Infrastructure judgment

Ask the right technical questions.

02 Customer leadership

Bring the right people to a clear decision.

03 Reusable impact

Turn lessons into tools and guidance.

Recurring colleague feedback: technical clarity, cross-team collaboration and willingness to help.

Where would that combination be most useful to your team?
